ADVERTISEMENT.

THE following compilation presents the mere skeleton outline of a great subject ; and, in submitting it to public notice, acknowledgment is most justly due to Messrs. BAGSTER AND SONS, for permission to use the literary matter of their interesting and instructive volume, the "Bible in Every Land ;" and to MESSRS. LONGMANS & Co., for a like favour with regard to Dr. Latham's "Elements of Comparative Philology," a laborious, learned, and useful book, without which the present volume could not have been produced.

The compiler readily apologises for any defects in his matter and manner ; and takes this opportunity to thank his respected contributors, hereby exonerating them from any responsibility except for their own signed articles.

A list of signatures and writers will be found in the Appendix.

INTRODUCTION

ON

THE GEOGRAPHICAL DISTRIBUTION OF LANGUAGES,

Chiefly from DR. LATHAM.

AFRICAN.—The best way to study the wide and complex philology of Africa is to begin with the frontier of the Semitic languages, remembering that the Ethiopic branch of them is, to all appearance, indigenous to Africa; then to bear in mind that the Arabic, by intrusion and extension, is spread over a great part of Northern and Eastern Africa. The Eastern frontier, however, of the Arabic and the Syriac is in Asia, and in Asia it begins where the Persian and Turk areas end. For the philological geography of Africa it will be found useful to divide the continent into the following sections, regions, or areas: (1) The first division as North-Eastern until it approaches the Equator, and the parts between it and the Red Sea—in geography, Egypt, Nubia, and Abyssinia, in philology the Coptic, Beja, Nubian, and (in its geographical sense) the Abyssinian regions. (2) The Barbary States and Canary Islands. (3) The Desert, divided into the Western or Great (the Sahara), and the Eastern (or Libyan) Desert. (4) Senegambia, or the drainages of the Senegal and Gambia. (5) Sudania. This gives us what we get nowhere else in Africa, a continuous belt or zone of languages, with fairly determined boundaries from Senegambia to Abyssinia, *i.e.*, across the whole continent in its broadest part. Within the limits of this zone lie the fundamental materials for the study of African philology and ethnology. It is only, however, between the parallels of 10° and 15° N.L. that it is continuous, and this only approximately. (6) The Coast line. This means the sea-board of the Grain, Ivory, Gold, and Slave Coasts.

(7) The Delta (of the Niger). This brings us within the Equator, but only on the side of the Atlantic. The Abyssinian extends to (there or thereabouts) the same parallels on the side of the Indian Ocean. Neither, however, carries us beyond a limited area inland. Where these two limits, East and West, end, South Africa begins. It is, with the exception of the few degrees of latitude just indicated, either equatorial or belonging to the Southern tropic; it falls into two divisions. (8) The Inter-Tropical, or Kaffir. (9) The Extra-Tropical, or Hottentot. All these divisions are simply what their names imply, except only that Senegambia is made to reach as far as Cape Mesurado, so as to include the parts about Sierra Leone and Cape Mount.

AMERICAN.—The primary division is that between North and South. (1) In North America the connection with Asia is decided. Through the Aleutian dialect of the Eskimo and the Kamtschatkan it is direct; through the Yukahiri and other tongues it is indirect. The Eskimo is a definite class; the Athabaskan is also a definite class when compared with the Algonkin. The Chemmesyan, Hailtsa, Wakash, and Chinook are connected. The Jakon and Kallapuiah lead to the languages of the Sahaptin and Shoshoni class, among the congeners of which the sound of "tl" appears. In the Mexican it becomes prominent. Between the Rocky Mountains and the Pacific the Algonkin appears to have spread from West to East, and the result has told most on the Iroquois family. The South Oregon languages graduate into the Californian, the Californian into those of the Paduca class and those of Sonora, till we come to two great divisions, the Mexican and the Maya. (2) In South America there is a reappearance of the phenomena of the North: what the Athabaskan and Algonkin are in the one peninsula, the Quichua, the Carib, and, above all, the Guarani are in the other. With any South American vocabulary of adequate length, some North American root presents itself; some even from the extreme North, viz., the Eskimo area, which, along with the phenomena of transition, is the chief argument in favour of the fundamental unity of the two classes. The student from Peru finds Quichua words in every vocabulary he lights upon, whilst the student from Brazil finds Guarani words.

ASIAN.—Asia and Europe, though different quarters of the globe, form but a single continent, and as such have characteristics of their own. One great class of languages is absolutely common to the two—the great Ugrian or Fin family. We miss, no doubt, in Europe such districts as those of Caucasus, and the parts to the North of the Burmese Empire, where numerous mutually unintelligible languages are pressed together within a small area. Again, the inflected languages have their seat in Europe; the monosyllabic in Asia. On the other hand, it is only in the great central continent that Language can be studied in all its stages: the Monosyllabic stage in the South-East of Asia, and the Inflectional in

Western and Southern Europe. This makes Asia and Europe the only region in which the whole (or nearly the whole) history of Language can be studied. Besides this, in Europe and Asia we have a history. We can see how languages like the English and Russian are extending themselves; how the German has extended itself; how the Latin had previously extended itself. We can see how languages like the Keltic, the Lithuanic, and the Fin recede. (1) The Western division is the one with which we are most familiar; it includes Great Britain, France, Spain, Italy, Germany, the Valley of the Danube, and Greece; allowance being made for the Turk and Hungarian, which are intrusive. (2) The great Northern area is in Russia conterminous with the Western, which means, roughly speaking, Northern Asia with a large part of Europe; the chief displacements having been effected by the great spread of the Turk language. (3) The South-Eastern area begins with the North frontier of China, and includes Thibet, Nipal, the Transgangetic peninsula, Assam, Siam, Pegu, Cambogia, Cochin-China, and China. (4) The South-Western area contains India, Persia, and the Caucasus; here the displacing languages are Indian, Persian, and Arabic, which last is treated as African.

OCEANIC.—The first thing which commands attention is its thorough insular or oceanic character; subordinate to this is the remarkable distribution of its members. In one great division, viz., the Polynesian, the diffusion has been decidedly recent. The first primary division contains the Malay; the second has been called Micronesian; the third division is Polynesia proper. The second group is called Kelenonesian or Melanesian, including Papuan, Australian, and Tasmanian ("Elements," p. 377). Australian languages are all upon the same general grammatical construction. Mr. Moorhouse says that "not one-twentieth part of the words agree in root, and yet there is evidence sufficient to satisfy any one that they belong to the same family." All have suffixes to show relation; a dual in substantives, adjectives, and pronouns; no sibilant sounds, no auxiliary verb, no passive voice, no "h," they abound in the pleonastic, and distinguish genders by postfixes. The only point of agreement is in the first personal pronoun, "I"; this is "nga-nga" on the Swan River; "nga-toa" in New South Wales; "nga-ti," Adelaide; "ngai-tyo," Mount Barker; "gni," Murchison River; "nga-pe," Encounter Bay; "ngai," Port Lincoln; "nga-ppo," Murray River; "naddo," Murrumbidgee River; "nga-pe," Lower Murray; "noga-toa," Hunter River. At the same time, the Malayan is "nga-n"; the Sumba, "nga-nga"; the Thibetian, "nga"; the Corean, "nai"; and the Burmese, "ngai." Yet Dr. Latham finds no Australian dialects resemble those of the Asiatic Isles. Mr. Norris first detected similarity of the grammar between the Australian and the South Dravidian languages of India, spoken before the Aryan migration to the Ganges. Mr. J. R. Logan, of Singapore, thinks the Australian the most ancient of the Indo-Australian tongues.

He says they are "a remnant of the Proto-Scythic era of the harmonic development, and between Chinese and American." He regards them, with the other kindred dialects of South-Eastern Asia, as in existence "before the expansion of the numerals one, two, and three into higher binary and ternary terms." According to him, "the pronominal roots are compounded with definitives, singular and plural, with the numeral two to form duals, with masculine and feminine definitives in the third person, and in all the three persons with each other; thus producing not only absolute and relative plurals of the first person, but several other complex plurals.

DICTIONARY OF LANGUAGES.

☞ For Additions see Appendix. ☞

A.

AACHEN.

A sub-dialect of low German or PLATT-DEUTSCH, vernacular at Aix-la-Chapelle, Lower Rhine. See Müller and Weitz's "Idiomatikon," Leipsig, 1836.

ABABDEH *or* ABADEH.

SEMITIC: a different form of speech was formerly vernacular at Sheikh Abade, in Upper Egypt; the site of some ancient ruins on the banks of the Nile. Since superseded by ARABIC. Adelung: "Mithridates," iv., p. 502.

* * A division of the BEJA, BEJAWI, or BISHARI family; they are the most northerly members of this class, which occupies the desert between the Nile and Red Sea from Cosseir to Suakim. R. G. L.

ABADJA.

African: a sub-dialect of the OTAM.

ABAK.

A dialect of the Philippine Islands, closely allied to BISSAYAN and TAGALA. See Jülg's "Vater," p. 1.

ABANTES.

An extinct form of speech, classed as THRACO-ILLYRIAN, formerly vernacular in the I. of Eubœa, now called Negropont or Egripos, in the Grecian Archipelago. Adelung: "Mithridates," ii., p. 362.

ABASCI *or* ABASSIAN, *see* ABSNÉ.

ABBEVILLE.

A sub-dialect of FRENCH, vernacular in Picardy. See De Soilly's "Idiome Picard," Abbeville, 1833.

ABBITIBBE.

American. Dialect of the Christinos or Cree Indians; classed as ALGONKIN. See Jülg's "Vater," p. 204.

ABENAKI or ABENAQUI.

A dialect of the ALGONKIN race of N. American Indians, spoken in Lower Canada and the State of Maine. The tribe once occupied the valley of the R. Kennebeck; but the name also includes the Etchemins, Micmacs, and others. See Rasles. Dict., 1833; Vocabulary in Amer. Ethnol. Trans. ii., p. 109.

ABIPONIAN.

A name given by the early Spaniards to the language spoken on the western bank of the Parana in S. America; although on the borders of the Gran Chaco it differs considerably from the dialects spoken in that district. See Dobrizhoffer's "Geschichte," 3 vols., 8vo, Vienna, 1784.
D. F.

ABOR.

A dialect of ASSAMESE, spoken by a hill tribe on the north-western extremity of Assam. Logan, Jnl. Indian Archipelago, 1853, p. 190.
See AKA.

ABSNE or ABKHAZIAN.

A name for the ancient ABASCI, now represented by Abascia or Abgah (Abkasia), a country of Asiatic Russia, lying between the Caspian and Black Seas. The modern word ABSNE is called Abkhazi by the Georgians; with the terminal "eti" for "land," it is Abkhazeti, and extends from Soukum-kale to Jenikale. The affinities of the Absné language are very uncertain; a large number of its words are similar to Circassian, but a larger proportion apparently not so. See Vocabularies in Güldenstädt's "Reisen;" Klaproth's "Reise;" "Asia Polyglotta," &c. H. H. H.

ABYSSINIAN, see AGAU, AMHARIC, GALLA, TIGRE, &c. 

ACADIAN.

American: That division of the ALGONKIN family containing the languages of Lower Canada and Nova Scotia.

ACAHE.

American: a doubtful name for a probable dialect of the TUBAR.

ACCAD.

The oldest known language before the Semitic population settled in Mesopotamia. W. S. W. V. See AKKADIAN.

ACCÁWAY.

A dialect of native S. American, belonging to the CARIB, or Karib group. Vernacular in the Highlands of British Guiana.

** CARIB of Demerara, closely allied to the CARABISI. See Hilhouse; Schomburgk, &c.

ACCRA or ACCARAH.

A language of the MANDINGO branch of native African, spoken by a small nation on the Gold-coast, about lat. 5° 35' N., long. 0° 12' W.; it is sometimes designated the GHAH or GA, and the people are supposed to have been removed by emigration from the interior. Ghana or Gana is a city, governed by a Sultaun, near the upper course of the Niger. Rask's "Vejlledning," 8vo, Copenhagen, 1828. See AQUAPIM.

ACHÆMENIAN PERSIAN.

The name of that form of the Old PERSIAN language which is used in the inscriptions of the Achæmenian kings, or the line of native monarchs which commenced with Cyrus the Great and terminated with Darius Codomannus, the antagonist of Alexander. The language is written in an arrow-headed or cuneiform character of a simple kind, and is closely akin to the Zend, Pazend, and the modern Persian. The best work on the language is that of Spiegel, "Altpersische Keilinschriften." G. R.

ACHAGUA.

A dialect of native S. American, vernacular on the R. Casanare, a tributary of the R. Orinoco; and closely allied to MAIPUR. "Mithridates," iii., p. 631.

ACHASTLI.

AMERICAN: spoken on the coast of California between San Francisco and St. Diego.

ACHINESE.

A language of the MALAYAN family, spoken in the kingdom of Ache or Achin, the northernmost part of Sumatra. It is distinguished from all other Malay languages by having the accent on the terminal instead of the penultimate syllable, and by a good deal of monosyllables. It is at present very little known, but its presumed affinity to the monosyllabic languages of Asia renders its study highly interesting for investigating the origin of the Malay race. P. J. V.

ACOMA.

A dialect of native AMERICAN, vernacular in New Mexico. It is one of the dialects spoken by the Pueblo Indians on the R. Grande. It is also called LAGUNA.

ACROA-MERIM.

American: a dialect of the GEZ class, vernacular in Brazil. See Von Martius, vol. ii., p. 144.

ADAIHE or ADAIHI.

A very isolated language of N. American. Spoken in Louisiana, in 1805, by forty individuals only. Vocabulary in "Archæologia Americana." It is also called ATAYO. Vocabulary Amer. Ethn. Trans., vol. ii., p. 95.

ADALI (*pl.* ADAIEL *or* ADAL.)

Largely SEMITIC. An Abyssinian dialect, spoken by the tribes between the Highlands and the sea coast. See "Salt's Voyage;" Appdx. i., p. 6.
C. T. B.

ADAMPI.

A native African dialect, closely resembling ACCRA and KREPEE, vernacular on the Gold-coast, W. Africa.

ADAREB, *see* BEJA.**ADELAIDE.**

A variety of native AUSTRALIAN, formerly vernacular at Adelaide, S. Australia; it differs but little from other dialects of the Gulf St. Vincent.

ADIGE.

A name for the CIRCASSIAN proper, as opposed to the APKHAZ.

ADIYAH.

Otherwise FERNANDIAN: the language of Fernando Po, an island on the W. coast of Africa, near the mouths of the Niger.

ÆOLIC.

A dialect of ancient GREEK spoken in Bœotia, Thessaly, Ætolia, Elis, Lesbos, Chios and the N.W. part of Asia Minor. Pindar, Sappho, and Alcæus wrote in it.
G. R.

ÆTHIOPIC, *under* E.**AFER.**

Native name of the DANAKIL.

AFFADEH.

African: a dialect of the BORNÜ.

AFFAR, *see* ADALI.**AFGHAN**, *see* PUSHTOO.**AFNU.**

African: a dialect of the HAUSSA.

AFRICAN.

A name for all native dialects of Africa, not directly SEMITIC. Works by Borth, Kölle, Bleek, Beke, Sir G. Grey, Clarke's "Dialects of Africa."
See INTRODUCTION.

AFUDU.

A native African dialect of the OTAM, vernacular on the coast of W. Africa, about 4° N. L.

AGAU or AGAW.

A language of **ABYSSINIA**, spoken in three dialects; 1. The **HHÁMARA**, or **AGAU** of Lasta, the Tcheratz Agows of Bruce; 2. The **AGÁWI** or **AGHAGHA** of Aganmider, *i.e.* Agau-land; 3. The **FALASHA** spoken by the Israelitish people scattered over the northern and western parts of the country. "Salt's Voyage," Appdx. i., p. 6. C. T. B.

AGGLUTINATIVE.

A name applied to certain languages, when "two unaltered roots combine to form words;" and words brought into mutual relation by syntax undergo a change of form, accent, or meaning; the **COPTIC**, for example, is considered as essentially agglutinative. The American agglutinative languages are called polysynthetic or incorporating. These languages have generally little or no literature.

AGOLELEGMÜT.

The **ESKIMO** of N. America and Behring's Straits, especially the island of Nunivok. The terminal "müt," which is common from Behring's Straits to the parts about Monnt St. Elias, is derived from the Eskimo. See Chromtschenko's "Reise-Journal," 8vo, St. Petersburg, 1824.

R. G. L.

AHOM.

A nearly extinct language formerly spoken in Assam, a province of British India; it is a dialect of **SIAMESE**, monosyllabic in form, and appears to have been transported by emigration from the borders of China.

AHT, THE.

American: dialect of Van Couver Island; spoken by all the W. coast tribes, from S. of Quatseeno to Port San Juan on De Fucas Straits. See Sproat: "Scenes of Savage Life." All the tribes speaking it end in "aht."

R. B.

AHTIAGO.

A dialect of **MALAY**, vernacular in Ceram, closely allied to **TELUTI** and **ALFUROS**.

* * * The more correct form would be **ATIÁHU**, the name of a village on the S. coast, with a mixed population. The vocabulary quoted by Mr. Wallace does not constitute a distinct dialect.

P. J. V.

AIAWONG.

A dialect of native **AUSTRALIAN**, belonging to the W. coast.

AIMARA.

A dialect of the Indians of S. America, largely augmented by Spanish. The natives were subject to the Incas of Peru, at the conquest, and now inhabit the high ground ne Lake Titicaca or Chncuito. They are closely allied to the Quichua or native Peruvians.

See **AYMARA**.

AIMAUK.

A dialect of MOGHOL, spoken by the Tshehar-Aimauk, N. W. Afghanistan, in the neighbourhood of Herat.

AINO.

The native name for the language of the Curile Islands, meaning "man." 

AIRICA.

American: a dialect of the BETOI.

AITUTAKIAN.

A mixed form of the TAHITIAN and the RAROTONGAN dialects. An island in the Hervey group, S. Pacific. Example, "mau-tangata" = "men." W. G.

AKA (1).

A dialect spoken by a hill-tribe to the N. of Assam. It is almost identical with ABOR. See Brown's Table: "Transactions of the Asiatic Society of Bengal," 1837.

AKA (2).

African: sometimes used for the YORUBA, of which it is a sub-dialect.

AKABI, see UKUAFI.**AKKADIAN.**

A name sometimes given to the language used on the earliest Babylonian bricks, especially those found at Mugheir (Ur), Warka (Erech), Senkareh, Niffer, and other very ancient Mesopotamian cities. The general character of the language is TURANIAN; but its vocabulary connects it with the dialects of Southern Arabia and Abyssinia, more especially with the Mahra, Galla, and Wolaita. The writing is a rude and very complicated cuneiform. It is supposed that the language was spoken in Babylonia from a very early age (B.C. 2500?) to the date of the Assyrian conquest, about B.C. 1300. By that time it had become the language of an extensive literature, and as such, continued to be studied by the more learned Assyrians down to the close of the Empire, B.C. 624. The later Assyrian tablets are to a great extent translations from it. See Rawlinson's "Ancient Monarchies," vol. i., pp. 61—69, 2nd ed. G. R.

AKKIM.

African: a sub-dialect of FANTI.

AKO.

An African dialect, somewhat allied to AFUDU.

AKRA.

African. Language of the Gold-coast, for the parts about Cape Castle. See AQUAPIM.

AKRIPON.

African : a sub-dialect of FANTI.

AKUSH.

A dialect of LESGIAN, spoken in Daghestan (the ancient Albania), a district situated between the Caspian and the Black Sea.

AKWAMBU, *see* AQUAPIM.

ALABAMA.

AMERICAN. Derived from "Alibamon," the original occupants of the modern State so called.

ALANI.

A people originally settled in Eastern Europe and Western Asia, very powerful from about A.D. 75 to A.D. 461. They are now generally considered to have been of the FINNISH stock, akin to the Ostiaks, Samoeids, and other races of Northern Asia. G. R.

ALARODII, *see* URARDA.

ALATYAN.

A name used by Prof. Steinthal for the URAL-ALTAIC or TURANIAN languages.

ALBANIAN.

The vernacular tongue of modern Albania, a maritime province of European Turkey, which answers to the ancient Epirus ; the inhabitants are a mixed race, including Arnauts, who are probably descended from the ancient Illyrians, Greeks, and Turks. The ancient language, called old ILLYRIAN, and closely allied to GREEK, has become mingled with SLAVONIC, written in GREEK characters. The native name of the Albanian dialect is SKIPETAR. Both terms mean "mountaineers." The modern language is sub-divided into the GHEGH and the TOSKI. See Hahn : "Albanische Studien," Jena, 1854.

ALEMANNIC or ALLEMANIAN.

The oldest form of TEUTONIC or HIGH GERMAN with which we are acquainted ; it is the language attributed to the Suevi or Swabians, who, emigrating to the S., formed with other tribes a great confederation on the Rs. Maine, Rhine, and Danube.

. See Bosworth's "Dict. of the Anglo-Saxon Language," ed. 1838, p. 120. W. W. S.

ALEUTIAN or ALIOUT-LISEYEFF.

The dialect of the Aleutian or Fox Islands, in the N. Pacific, between Asia and America. The inhabitants resemble the MOGHOLS in physical peculiarities, but their language is allied to the ESQUIMAUX. Vocab. Amer. Ethn. Trans., vol. ii., p. 130. 

ALFUROS.

Dialects of **MALAY**, spoken by uncivilized tribes of the Indian Ocean. Adelung calls them "Harafora auch Alfurier" in the Moluccas. "Mithridates," i., p. 585. Wallace calls them the true indigenes of Gilolo, and the predominant type of Ceram. "Malay Archipelago," ii., pp. 16, 19, 96. It is the same word as in the Arafura Seas, W. of N. Guinea. 🗺️

ALGIERIAN.

A form of **ARABIC** vernacular in N. Africa.

ALGONKIN or ALGONQUIN.

A very large class of native **N. AMERICAN** dialects, including the Chippewas, Blackfoot, Ojibeway, Ottawa, Mohican, Shawnees, and other principal eastern tribes of red Indians. Vocab. Amer. Ethn. Trans., vol. ii., pp. 78, 106.

ALIEH, see EYISH.**ALIKHULIP.**

A dialect of **FUEGIAN**, spoken in Terra del Fuego, S. America. Described in Darwin's "The Voyage of the Beagle."

See also TEKEENICA and TSONECA.

ALLEUTIAC, see MILCOCAYAC.**ALLOPHYLIAN.**

A name for the **AMERICAN** and certain unclassified languages; generally used for all languages which philologists have not yet defined.

ALLOR.

A dialect of insular **MALAY**, vernacular in the Indian Ocean. This island belongs to the Timor group; its inhabitants are of the dark Papuan type. The language is said to differ but little from that of the neighbouring island of Solor. P. J. V.

ALMEIDA.

A dialect of **S. American**, belonging to the **TUPI** or **GUARINI** family, spoken in Brazil, and allied to **CARIB**. *See OMAGUA.*

ALPHABET.

The English name for the collection of letters or written characters in our language, and derived from their Greek synonyms—viz., Alpha (A) + Beta (B), as in the line from Juvenal—

"Hoc discunt omnes ante *alpha et beta* puellæ."—Sat. xiv., l. 209.

These letters or characters are the representatives of certain sounds or utterances; and their numbers, forms, names, and equivalents differ very materially in different countries and in different districts. Ballhorn's "Alphabete or. und occ. Sprachen," Leipsig, 1853; 2nd ed., London.

See LETTERS.

ALPINE.

A collective name for several local dialects derived from old **ITALIC**, but mingled with modern **FRENCH**.

ALSACIAN.

A sub-dialect of old HIGH GERMAN.

ALTAIC or URAL-ALTAIC.

Generic name for the MÖGHOL, TUNGUS, TURK, SAMOYED, and UGRIAN languages. See Castren's "Altaischer Volker."

AMAKOSA.

African.

See KAFFIR.

AMAT.

A dialect of older DRAVIDIAN vernacular in Nepaul.

AMAZIG.

A name for the BERBER of N. Africa. It is called AQUEL AMARIGOR AMAZIG, *i.e.* "Noble tongue;" the native dialect of Berbers.

AMAZONS.

A class of native dialects spoken by tribes along the banks of the R. Amazon, S. America; more especially the Amazonas and Humanos, formerly of the lower Putumayo. Wallace, p. 250.

AMBERBAKI.

A dialect of PAPUAN, vernacular in a village so named on the N. W. coast of N. Guinea.

AMBLAU.

An island of the Amboyna group; the language, belonging to the ALFURU, or *semi*-ALFURU, dialects of the Moluccas, seems to differ very considerably from that of the neighbouring islands; judging from the vocabulary given in Mr. Wallace's "Malay Archipelago." P. J. V.

AMBOYNA.

A dialect of the Molucca Islands, in the Indian Ocean; known as AMBOYNESE MALAY. The provincial dialect is termed BAHASA-TANAH, the language of the Moluccan Alfuru. See Vocabularies by Wallace and Lüdeking. P. J. V.

AMERICAN.

A name for all dialects of the aborigines throughout N. and S. America. Trübner's "Bibliotheca Glottica," London, 1858.

See INTRODUCTION.

AMHARIC.

The Court tongue of Abyssinia for many centuries. Amhara proper is that district lying between the Dender and Tacazze branches of the Nile. It closely resembles the ETHIOPIC, with alphabets that are nearly identical. The root word is probably identical with "Ham" or "Chem," the poetical name for Egypt in the Psalms of David.

* * * A SEMITIC dialect sprung from the ancient ETHIOPIC, which has gradually become the dominant language of Abyssinia. Its vocabulary and grammar still closely resemble the Ethiopic, but it has adopted a barbarous pronunciation, and the gutturals, which form so important a part of the Semitic alphabet, are no longer pronounced. The best memoir upon it is that by Gesenius in the Encyclopædia of Ersch and Grüber, under the heading "Amharische Sprache." Other Abyssinian dialects are the ADARI, the AFAR, the SOMAULI, the SAHO, the languages of Tigré, Danakil, Adaiël, and of Harar. R. P. S.

AMOUR or AMUR.

Dialects of TUNGUS, vernacular in E. Asia on the R. Amúr. See Latham, pp. 75, 76.

AMYRGII.

An ancient Scythic people, called "Humawarga," by the Achæmænian Persians, and "Amyrgians" (*Ἀμύργιοι*) by the Greeks. They seem to have inhabited the high plateau between the Thian-Chan and the Hindu-Kush ranges. Most probably they were TURANIANS. G. R.

ANADEER or ANADYR.

The upper and central parts of the R. Anadyr, on the north-eastern extremity of Asia, are occupied by the Tshuktshi, an Asiatic tribe. On the lower Anadyr, however, there is an Eskimo settlement. See NAMOLLO. R. G. L.

ANAMITE or ANNAMITE.

A monosyllabic tongue, closely allied to CHINESE. It is the dialect of Tonquin and Cochin-China, extensive tracts of land in S.E. Asia. Also called ANNAMESE. See Dictionaries, A-Latin and Latin-A, by Taberd and Pigneaux, 2 vols., 1838; Marshman, Serampore; and Brown's "Comparative Table," vol. vii., Trans. As. Soc. of Bengal.

ANDAMAN.

The dialect of the Mincopie or inhabitants of the Andaman Islands. It is considered to be allied to the BURMESE.

ANDAQUI.

AMERICAN. Dialect of New Grenada, vernacular on the eastern slope of the Andes, and upper part of the R. Putumayo. See "Los Indios del Andaquí," pp. 27-29. R. G. L.

ANDARCOS, see TEXAS.**ANDI.**

A dialect of LESGHIAN, allied to AKUSH; vernacular in the Caucasus.

ANDIAN or ANDO-PERUVIAN.

A collective name for certain native dialects of S. America, as AIMARA, ARAUCANIAN, QUICHUA, &c.

ANDOA.

AMERICAN. Spoken on the frontiers of New Grenada, and on the head waters of the Rs. Tigre and Pastazza. It is bounded by the Shimigas and Zaparu. Small vocabulary by Spruce. R. G. L.

ANDREANOWSKI ISLANDS, see ALEUTIAN.**ANEITEUM or ANNATOM.**

A Polynesian dialect, allied to PAPUAN, vernacular in Anciteum, the easternmost island of the New Hebrides group, S. Pacific Ocean. The language began to be reduced to written form, by the use of Roman letters, by the London Missionary Society; subsequently completed in books, now used by natives, by the "U. P. R. C." Mission of Scotland.

ANFUE.

A native dialect, allied to ADAMPI, from the Gold-coast, W. Africa.

ANGAMI.

A dialect of ASSAMESE, vernacular in central and lower Assam.

ANGLIAN.

A name sometimes given to that dialect of the oldest ENGLISH which was spoken in the north and east of England. It has been sub-divided into the NORTHUMBRIAN and EAST-ANGLIAN. It has also been called DANO-SAXON. See Bosworth's "Dict. of the Anglo-Saxon Language," ed. 1838, p. 21. W. W. S.

ANGLIAN, EAST, under E.**ANGLO-SAXON.**

A compound language formed by the union of several tribes of Teutonic origin, who conquered and settled in Britain, about A.D. 449, thence called England. The language is of cognate origin with the ALEMANNIC and GOTHIC; but with accretions from the SCANDINAVIAN and LOW DUTCH.

* * What is called ANGLO-SAXON is really the oldest form of ENGLISH. The Anglo-Saxon of the first period extends from A.D. 450 to A.D. 1100; that of the later period from A.D. 1100 to about A.D. 1250; after which date we arrive at early Middle English. The specimens of the literature are too numerous to require mention. See the dictionaries by Lye and Manning, Bosworth, Grein, Ettmüller, and the list of MSS. in Hickeys's "Thesaurus," vol. iii. W. W. S.

ANGOANE.

A dialect of MOZAMBIQUE, vernacular on the E. coast of Africa.

AQUITANIAN.

The dialect of Aquitania or Aquitaine, a division of ancient Gaul, lying S.W., which included the provinces of Guyenne, Gascony, &c.

ARA.

A name for the ARINI.

ARABIC.

One of the three main branches of the SEMITIC family, spoken in the peninsula of Arabia. Unknown till the century before Mahomet, it suddenly then reached its highest perfection in the poems of the Moallakât. It is the richest, the most flexible, and most exact of all the Semitic tongues, and its grammar the most subtle and perfect, probably, of all known languages. The dialect of the tribe of Koreisch, adopted by Mahomet in the Koran, has been, since the seventh century, the classical language of large parts of Asia and Africa, and has greatly influenced the Turkish, Maltese, Persian, Hindi, and other tongues, owing to the wide range of Arabian conquest. Classical Arabic must be distinguished from Arabic as actually spoken. The "vulgar" Arabic makes scarcely any distinction of vowel-sounds, has a grammar simple to rudeness, and is destitute of the richness and versatility of the tongue as employed by its most famous scholars.

R. P. S.

ARAGO.

A dialect of PAPUAN, vernacular in New Guinea.

ARAIACU.

American : a dialect of N. Brazil, to the W. of Fonteboa ; it is allied to the BARRÉ, BANIWA, MANOA, &c. See Von Martius, vol. ii., p. 133, who places it in his CREN or GUERENO class.

R. G. L.

ARAKANESSE or ARRACANESSE.

A monosyllabic tongue closely allied to the BURMESE, otherwise called the RECCAN or RUKHENG. The district in which it is spoken forms a narrow strip of sea-coast, about 500 miles long, extending from Cape Negrais in the S. towards Chittagong in the N., along the E. peninsula of S. Asia.

ARAMAIC.

Generic name of the languages spoken in the region extending from the Taurus and Lebanon to the R. Tigris. It is one of the main branches of the SEMITIC stem, and is itself divided into two dialects, EAST ARAMAIC, or CHALDEAN, and WEST ARAMAIC, or Syriac. The former became the medium of Jewish thought, and is the language of the Targums and the Talmud, and also of the Samaritan Pentateuch. The latter is Christian. A sub-dialect spoken by the heathen is called SABAEAN, or NABATHEAN. The oldest remains of the Aramaic are found in the name given by Laban to the Hill of Witness between him and Jacob.

R. P. S.

The Aramaic alphabet was identical with, or derived from, the PHœNICIAN.

ARAPAHO or ARRAPAHO.

The dialect of a native tribe of N. American Indians of the ALGONKIN family, vernacular on the R. Platte ; originally on the Upper Saskatchewan. Schoolcraft's "Indian Tribes," vol. iii., p. 446 ; Vocab. Amer. Ethn. Trans., vol. ii., p. 96.

ARAQUAJU.

American : a dialect of the BRAZILIAN class, vernacular on the Upper Amazons. See Von Martius, vol. ii., p. 17.

ARAUCANIAN.

ARAWACK.

A dialect of CARIB, spoken on the N. coast of S. America, in Surinam, Venezuela, and the Guianas (Berbice); supposed to have been introduced by aboriginal settlers from Hayti and other W. Indian islands.

ARAYAS, *see* TAINO.

ARCHAIC GREEK.

A name for the original CADMEAN alphabet of ancient Greece, it consisted of seventeen letters only, and was derived from the PHOENICIAN.

ARDA.

Spoken, according to Alcedo, on the Upper Napo, on the boundaries of New Grenada, Brazil, and Ecuador. A "Doctrina Christiana," Madrid, 1658, and a "Paternoster" are the only recorded specimens of the ARDA. No philologist seems to have examined them. The fragmentary languages with which they are the most likely to have been allied are the ANDOA, the SHIMIGAES, and the ZAPARA. "Ludwig," p. 12.

R. G. L.

ARDRAH.

AFRICAN : a dialect of the Slave-coast.

ARGOT.

French *patois*, applied to cant and slang dialects. See Jülg's "Vater," pp. 132, 485.

ARIPE.

AMERICAN : dialect of Lower California.

ARIS.

A dialect of TOUMBULU.

ARKIKO.

A dialect of ETHIOPIC allied to Adaiel; otherwise classed as a sub-dialect of AMHARIC.

ARMENIAN.

The vernacular speech of Armenia, a mountainous country of Asiatic Turkey, bordering on the S.E. extremity of the Black Sea, including Mt. Ararat. Armenian is written from left to right, and has an alphabet peculiar to itself, which has been modernized from an older original, attributed to Miesrob, A.D. 406.

** The language is essentially an ARYAN dialect, akin to ACHÆMENIAN PERSIAN and ZEND, but still distinct from either; into which have been absorbed a large number of TURANIAN roots. G. R.

ARMENIC.

A branch of the great Indo-European family of speech not yet clearly defined. It is the parent of modern ARMENIAN, and of an older form of the same language, called OLD ARMENIC, now extinct. It has, provisionally, been classed with KURDISH, OSSETIC and PUSHTOO.

See ARYAN.

ARMENO-KURDISH.

A name for the KURDISH dialect, written in the characters of the Armenian alphabet.

ARMORICAN.

A Celtic dialect, called also BRETON, anciently vernacular in Armorican Gaul; it was the national language of the independent Duchy of Brittany, and is still spoken in the modern French departments of Finisterre, Morbihan, and Côtes-du-Nord; the language is closely allied to WELSH, CORNISH, MANX, GAELIC, &c.

ARNAUT, *see* ALBANIAN.**ARNIYA.**

A dialect of DARDU, allied to Kashkari.

ARO *or* ORO.

A dialect of W. Africa, allied to MBOFIA, vernacular in the locality of Brass Town.

AROO *or* ARRU.

Dialects of PAPUAN, vernacular in a group of islands lying to the S.W. of New Guinea, in the Asiatic Archipelago.

** Herr Van Rosenberg distinguishes two chief dialects. 1. A vocabulary collected at Wammer, Watelei, and Traugan. 2. His "Wanumbæe Vocab." Others are the Wokam Uju dialects, given by Herr Von Eybergen. Mr. Wallace writes WAMMA, WOKAN and OUGIA. P. J. V.

AROPIN.

A PAPUAN dialect, vernacular in S. Pacific. See Latham, p. 332.

ARORAE.

An island of Kingsmill group, S. Pacific. The language is a mixed dialect of Samoa and Sandwich groups. First reduced by missionaries from Hawaii, 1858; now occupied by Samoan Christian teachers.

W. G.

ARROW-HEAD.

A term employed to designate writing of a particular kind. The ancient inhabitants of Babylonia, Assyria, Armenia, Persia, and other adjacent regions used characters of which the ultimate element was the wedge:  The resemblance of this form to the metallic point with which arrows were anciently tipped caused our early Oriental travellers to call all characters thus composed "arrow-headed." Recently, the term "cuneiform," adopted from the French, has displaced "arrow-headed," which is now seldom used. It is important to remember that the two terms, whichever of them we employ, in no case properly designate a language, or an alphabet, but simply a manner of forming the conventional signs of speech. There are at least five quite distinct "arrow-headed" alphabets; and in one case the same cuneiform alphabet is used to give written expression to two quite different languages.

G. R.

ARYAN.

A name for the INDO-EUROPEAN family of languages, derived from Ariana, a province of the ancient Persian empire. The word is widely diffused throughout Eastern Asia: *ex. gr.*, the small river Arius, now Heri-Rúd, on which stands the city of Herat; also the river Arus, or Araxes, near Mt. Ararat, in Armenia; Iran, Irac, or Iron. The term "Aryan," in Sanskrit, implies "noble," but the root is very widely diffused in an agricultural sense; as in the Greek *ἀρόω*; Latin, "aro" "to plough;" English, "arable."

The Aryan family of languages is divided into the following branches: —ARMENIC, CELTIC or KELTIC, HELLENIC, ILLYRIC, INDIC, IRANIC, ITALIC, TEUTONIC, and WENDIC (or SLAVONIC-LETTIC). Each of these groups or branches will be treated under its proper stem, with sub-branches.

See INTRODUCTION. 

ASHANTEE or ASHANTI.

Sometimes called ODJII or OTSHI, the national language of the Guinea coast, W. Africa; it belongs to the MANDINGO branch, and is closely allied to the FANTEE, spoken on the Gold-coast.

ASIAN or ASIATIC.

Klaproth's "Asia Polyglotta," Paris, 1823, 1832. See INTRODUCTION.

ASILULU, *see* AMBOYNA.

ASSAMESE.

The modern language of Assam, an extensive province of British India adjoining Bengal; it extends along the course of the R. Brahmapootra, towards Thibet. The archaic dialect known as AHOM, being extinct, has been superseded by a dialect of BENGALI; Assamese is, however, unintelligible to the natives of Bengal. It is written in the Bengali character. See Brown's "Comparative Table of Dialects: Asiatic Society of Bengal."

ASSAN.

A dialect of **OSTIAK**, or **YENISEIAN**, vernacular in Siberia. See Castrén's "Versuch."

ASSINEBOINE.

A N. American dialect, spoken by native tribes of the Saskatchewan River line, between the Red River and Rocky Mountains

ASSINESE.

African; a sub-dialect of the **FANTI**.

ASSYRIAN.

The language of the ancient Assyrians, or people of Assyria, a tract lying upon the R. Tigris, between the thirty-fourth and thirty-seventh parallels. This language has become known to us within the last twenty years, through inscriptions disinterred from the buried cities of this region. The form of speech is found to be **SEMITIC**, akin to Arabic, Syriac, Chaldee, Phœnician, and especially to Hebrew. It is written, however, unlike most Semitic tongues, from left to right. The characters are very numerous and complicated; they are of the class called "cuneiform" or "arrow-headed," being formed out of combinations of wedges. The best account of the Assyrian alphabet will be found in the "Expédition Scientifique en Mésopotamie" of M. Oppert. The language must be studied in the "Assyrian Dictionary" of Mr. Norris, and the "Elémens de la Grammaire Assyrienne" of M. Oppert. G. R.

BABYLONIAN.

A SEMITIC dialect spoken in Babylonia from the Assyrian conquest of the country, about B.C. 1300, to its occupation by the followers of Mohammed. It is closely allied to the ASSYRIAN (which see), but is somewhat simpler. The language exists in numerous inscriptions found in the country which cover the interval from about B.C. 620 to B.C. 540, and also in the trilingual inscriptions of the Achæmenian Persian, where it is found regularly in the third column. The best account of the language, which is written in a cuneiform alphabet based on the ASSYRIAN, will be found in Sir H. Rawlinson's "Analysis of the third column of the Behistûn Inscription"—*Journal of the Asiatic Society*, 1856. G. R.

BACHAN, *see* BATCHIAN.

BACTRIAN.

The dialect spoken in ancient Bactria (modern Balkh), now commonly supposed to be identical with the literary language called ZEND. It is not at all certain, however, that Bactria was the country in which Zend was spoken. But there can be no doubt that BACTRIAN was a very ancient form of ARYAN speech. G. R. *See* ZEND.

BAGBA.

An African dialect allied to the BAKELE of the R. Gaboon.

BAGBALAN.

A dialect of KOURI, vernacular in Central Africa. *See* small Vocabulary in Latham, p. 584.

BASPA or **BHASPA**, *see* **MÖGHOL**.**BASQUE** or **ESCUARA**.

A language spoken in the Spanish provinces, Guipuzcoa and Biscay, partially in Alava and Navarre; in France, only in the arrondissements of Mauléon and Bayonne in the department of the Lower Pyrenees. Five principal dialects, with several sub-dialects:—**GUIPUZCOAN**, **BISCAYAN** (and the dialect of Llodia) in Spain; and the **BAS-NAVARRAIS**, **SOULETIN** and **LABOURDIN**, in France. Clearly agglutinative. Analogies detected with the **FINNISH**, by Prince L. L. Buonaparte and others; and **N. American (ALGONKIN)** by Pruner-Bey and Charency; also with the **KHAMITIC** by D'Abbadie, and **ACCADIAN** by Sayce. Fabre's "Dict. Français-Basque," Bayonne, 1870, "Essai de Grammaire," par W. J. Van Eys, Amsterdam, 1867. *See* ESCUARA.

BASUNDO.

A native dialect of Africa, belonging to the N.W. division of the Kaffir group, vernacular in the R. Gaboon.

BATAK, or BATTÀ.

A native dialect of wild Malays in Sumatra; it is allied to BUGIS, with written characters imitated from the DEVANAGIRI alphabet of SANSKRIT.

* * The Orang Batta are the indigines of Sumatra; BANJAK, PAKPAK, ZINGKAL, TOBA, are all sub-dialects of BATTÀ in Sumatra. See Van der Tunk's "Collection of Battak Texts, with Notes and Translations," 4 vols., Amsterdam, 1860-62; "Bataksch Leesboek"; and "Bataksch-Nederduitsch Woordenboek," Amsterdam, 1861. 

BATAR, *see* BOR.

BATAVIAN-MALAY.

What is called BATAVIAN-MALAY is perhaps rather a Sundanese than a Malay dialect. It is the language of the natives of Batavia and its environs, a population sprung from the conflux of individuals from almost every part of the Archipelago; yet the SUNDANESE element seems to predominate. This language ought not to be confounded with the low-Malay spoken at Batavia by Europeans and natives in their ordinary intercourse, which is merely Malay corrupted by the introduction of foreign words and forms of speech. To these Europeans the language which the natives use among themselves is quite unintelligible. P. J. V.

BATCHIAN.

CANAANITE or CANAANITISH.

The language of the ancient inhabitants of the country west of the Jordan, closely allied to HEBREW. As the Canaanites were descended from Ham, but the Hebrews from Shem, the similarity of their languages has led to much discussion. Many of the new critics, Ewald, Winer, Bunsen, Renan, have argued that both peoples must have had a common origin. But since the publication of Knobel's work on the ethnology of Genesis, this view has been generally abandoned, and critics hold with Gesenius and J. G. Müller that the Hebrews adopted the language of Canaan. In Gen. xxxi., 47, Laban uses an Aramaic dialect, while Jacob uses Hebrew. R. P. S.

Somewhat different from the word ANTHROPOLOGY. See Latham: "Descriptive Ethnology," and others; Prichard: "Physical History of Mankind," and others.

ETRURIAN or ETRUSCAN.

An early dialect of Italy, known only from inscriptions; it is classed by some as THRACO-PELAGIC or GRECO-LATIN. The Etruscans were the most dominant power of Italy in pre-Roman times; their native appellation was Ras or Rasena, but the Latins called them Tusci, the Greeks called them Tyrrhenians. The Abbé Migne has discussed the whole question. See "Dict. de Linguistique," &c., folios 554-600, where the authorities are cited and references given. Works by Mrs. Gray, Lord Crawford, Döderlein, Müller, Betham, Zeuss, Mommsen, and Steub. See PALÆO-GEORGIAN.

GERMAN.

A word of very doubtful etymology, used for:—

(1) **GERMAN**: the typical language of modern **HIGH-DUTCH**, which is naturally derived from the ancient **ALEMANNIC**, and allied to **GOTHIC**, which, however, is classed as **LOW-GERMAN**. It is, in many dialects, the vernacular speech of the Empire of Germany, Prussia, Austria, Bavaria, &c. The form of its printed letters is of the class called Gothic, and both closely resemble Old English black-letter, but the use of Roman letter is gaining ground. Dictys. by Heyse, Hilpert, Sanders, Flügel, Grimm, Lucas, &c., Grammars by Grimm, Kehrlein, &c.

(2) **OLD HIGH-GERMAN**. See Massmann: "Gedrängtes althoch-deutsches Wörterb.," Berlin, 1846. *See GERMANIC.*

(6) **NIEDER PLATT-DEUTSCH, or LOW-GERMAN**. *See DUTCH.*

GERMANIC.

The main stem of **TEUTONIC**: divided into (1) **HIGH-GERMAN**, (2) **LOW-GERMAN**.

Under (1) we class the sub-branches called **OLD HIGH-GERMAN** and **MIDDLE HIGH-GERMAN**; from which again issue the modern dialects of **HIGH-GERMAN**. Under (2) we class **MÆSO-GOTHIC**, **ANGLO-SAXON**, **OLD DUTCH**, **OLD FRISIAN**, and **OLD SAXON**, from which again issue the modern dialects of England, Friesland, N. Germany (**PLATT-DEUTSCH**), Holland, and Flanders.

GHADAMSI.

One of the African languages called **BERBER**, known to us as spoken in the town of Ghadamis, which is situated S.E. of Tripoli, nearly in latitude 30° N. and longitude 10° E. The language is very imperfectly known to us, and seems to be of quite small extent; yet, in spite of the geographical position, it is no mere dialect of the Tamazight. Dr. Richardson brought home a meagre vocabulary of it, and a translation of the third chapter of Matthew into it, which were partly lithographed, and partly printed by the Foreign Office. F. W. N. *See LIBYAN.*

GOROPISER.

A nickname for unsound etymologists, derived from "Goropius," *i.e.* "Van Gorp," appellation borne by Jan Bécan, or Becanus (1518-1572), author of some speculative works.

GOTHIC.

An extinct idiom of Teutonic, classed as **LOW-GERMAN**. The Goths formed that large body of people who, under the names of "ostro," *i.e.* Eastern, and "visi," *i.e.* Western Goths, harassed the latter centuries of imperial Rome. The most permanent record of their tongue is found in the "Codex Argenteus," or "Silver Book," an imperfect version of the four Gospels, now preserved at Upsala in Sweden; it has frequently been printed, and represents the dialect of the Mæso-Goths, who were settled in ancient Mœsia, S. of the Danube, under the Emperor Valens. This version is attributed to Bishop Ulphilas or Little Wolf, who translated the Scriptures into Gothic, using an alphabet constructed by himself and adapted to their phonesis, said to be derived from the Greek, A.D. 318-378. See Diefenbach: "Wörterb.," 2 vols, Frankfurt, 1847-51; Meyer: "Die Gothische Sprache," Berlin, 1869. See **MÆSO-GOTHIC**.

R. G. L. (2.)

HAYU, see VAYU.

HEBRÆO-AFRICAN.

An epithet invented by Dr. J. Cowles Prichard, in imitation of Indo-European, to include a group of African languages which have definite relations to the HEBREW. These are especially the Abyssinian languages, the GALLA, the COPTIC, and the LIBYAN. Within the limits of an article we cannot state all the points of relationship, but we may note the remarkable similarity of the first and second pronouns, the mode of conjugating, the principal tense of the verb, the facility of forming derivative verbs from a primary (but the languages connected with Turkish have this), the inaptitude in compounding words, even so far as not even to prefix prepositions to verbs. The Abyssinian languages come nearest to Hebrew, and next the Libyan. Tutscheh notes the singular approximation of the Galla to the Arabic in the syntax used with the plural of nouns. The Coptic is of all the most distant from Hebrew. F. W. N.

HEBREW.

SEMITIC: closely allied to ARAMAIC and PHŒNICIAN. It is an extinct dialect spoken by the ancient Jews of Palestine, and preserved to us in their sacred writings known as the Old Testament Scriptures. The old Hebrew character, as found on coins, &c., has much resemblance to Phœnician. The Biblical alphabet, called Square Hebrew, has been traced by some to the captivity at Babylon, B.C. 603-536, but is regarded by others as much more recent. The Rabbinic characters are of a more cursive form, and the modern Jews of Germany and Poland used running hands of somewhat differing forms. For LATER HEBREW, *see* TALMUDIC, and for MODERN HEBREW, *see* JEWHEY. Lexicons by Fürst; Gesenius: Grammar, Lex.; Thesaurus, &c.

HIMYARITIC or HIMJARITE.

Name for the characters used in some early inscriptions of S. Arabia in a dialect allied to the MAHARI of Abyssinia. Mr. Palgrave, "Central and E. Arabia," vol. ii., p. 240, states that the modern Himyarites, who speak a dialect of modern Arabic, are called the "reds" : "áhmar" in Arabic ; but it seems more probable that they are the Hi or Hy-Mahari : "Hy" being a tribal prefix in Africa as in Ireland. Compare the Hi-breasil, the Hy-Many, or O'Kelly people ; the Hy-Fiachrach or O'Dowdy people. The use of the same prefix in Africa is proved by the Ki-Suaheli, the Hi or Ki-Kamba, Ki-Sambala ; cf. the Heb. ה; ח; which gives the transition from "h" to "ch" or "k" ; thus also we may have Ki-Afer for the people of Africa, the original Kaffirs : indeed we have the mature word in Ke-Kuafi, see under U. Hy-mahari would mean "the shore-people."

See EKHKILI.

HINANTSHI or HINA.

African : assigned by Barth to HAMARUA.

HINDI or HINDUWI.

The vernacular language of native Hindoos ; it is derived from SANSKRIT, and closely adhered to by all the Brahmin castes. It was probably the court tongue of Canaug or Kanoj, a chief city of Hindostan when Alexander the Great crossed the Indus and defeated Porus, B.C. 327. The language has many branches or sub-dialects, and is written in the Devanagri, or sacred alphabet used in the Vedas ; also in Kyt'hí, a sort of running hand. Ballantyne : "Elements," London, 1869 ; "Chrestomathie," Garcin de Tassy, Paris, 1849.

HINDOO.

INDIANS.

N. AMERICAN: The Nova Scotia Indians have all decayed away. They were a people who in their habits more especially used the sea-coast, banks of lakes, rivers, &c.; the mountaineer is the country Indian, solely engaged in hunting spoils for trade and subsistence. The E. States have still a sprinkling of mongrel races, so intermixed as to leave but a slight trace of the old N. American sons of the forest. The Red Indian of Newfoundland was cannibal in his habits, and the race is utterly extinct. I have not met, on the Labrador, any mixture between the Esquimaux and the mountaineer and Mic-Mac tribes, but frequently children of English and Esquimaux. J. T.

INDIC.

A name for the HINDOO branch of the great ARYAN family of languages, comprising SANSKRIT, PRAKRIT, PALI, MAHRATTA, HINDI, BENGALI, &c. The country N. of the Indus was called Arya-âvarta, "abode of the Aryas."

** A S.W. branch of the great ARYAN family, who in pre-historic times were settled to the N. and N.W. of Kâbul, became in the end the Brahmanic Aryans of India, and the Zoroastrian Aryans of Irân (Persia). There is no doubt that the Indian Aryans travelled mainly to the S.W., crossing first, and settling in the Land of the Seven Rivers—the Indus, Punjâb (or Five Rivers), and the Sarasvâti—and that they proceeded thence gradually along the Jumna and Ganges, till they reached the Bay of Bengal. Ultimately, under the name of Hindûs (whence Hindûstan), they occupied all the district around and in connection with this great river system, displacing and driving to the south an earlier race, who still inhabit the S.E. and S. of the Deccan (Dakshina, so called as on the right hand—dexter—of the invading Hindû race), and who are allied to the Moghols of Central Asia. The dialect of the earlier, as of the existing populations to the S. and E., is of Turanian or Nishada origin. The principal Aryan dialects at present are BENGALI, HINDI, and MAHRATTA, all of them lineal descendants of the Devanagari or Sanskrit, which is no longer a spoken language. HINDUSTANI, though mainly Aryan in its vocabulary, and wholly so in its structure, is rather the language of general communication than a distinct dialect. See "Comparative Grammar of the Aryan Languages of India," by Beames.

W. S. W. V. See DRAVIDIAN.

INDO-CHINESE.

A collective term for a class of languages embracing ANAMITE, STAMESE, and allied dialects. See Leyden in "Asiatic Researches," vol. x.; Brown's "Comparative Table" in the "Journal of the Asiatic Society of Bengal," 1837.

INDO-GERMANIC.

Same as INDO-EUROPEAN. See Schleicher: "Indo-Germanische Chrestomathie," Weimar, 1869; Fick: "Wörterbuch der Indogermanischen Sprachen," Göttingen, 1871. W. W. S.

INDO-PARTHIAN.

Name for an early dynasty of Kabulistan, then probably of much greater extent; their coins are found over the whole of the Punjab and into India. W. S. W. V.

INDO-PORTUGUESE.

Mixed dialect used at the seaports of Ceylon, formed by a combination of PORTUGUESE with DUTCH and SANSKRIT.

INDO-SCYTHIAN, INDO-SCYTHIC.

An early dynasty of Kabulistan founded about B.C. 80, by a nomadic people called Yue-tchi by the Thibetans.

** The language used by these monarchs on their coins is two fold; Aryan and Greek. See Wilson's "Ariana Antiqua," pp. 347-381. G.R.

INFLECTIONAL.

Same as polysyllabic; name for the highest class of speech yet known to man. It is specially applied to the Aryan family of languages, which express the "moods, tenses, cases, and all other modifications of meaning in verbs and nouns by means of suffixes mutilated fragments of words."—*Farrar*.

INSCRIPTIONS.

The most durable means of preserving individual records of written speech. They are termed, variously, "incised," "impressed," "lapidary," "monumental," "numismatic," "painted." The famous Rosetta and Carpentras stones, and the decree of Canopus from Egypt, and the Behistun rock inscriptions, are examples of bilingual records, that serve, by means of comparison, to facilitate decipherment. The Assyrian cuneiform writing and the Egyptian hieroglyphs have thus been explained, and the Chinese have in use extensive libraries of stone inscriptions at the present-day. See Gesenius: "Scripturæ Linguæque Phœniciaë Monumenta," 2 vols., Leipsig, 1837.

INTIBUCA.

American: one of the four native languages of HONDURAS.

IONIC or IONIAN.

A sub-dialect of classical GREEK; the original Ionians are said to have been PELASGOI. It was largely cultivated in Asia Minor, and is the dialect of Homer and Herodotus. For some time before the rise of the Attic school, circa B.C. 400, it was the established language of prose literature. See Portus: "Dict.: Ionicum-Græc.-Lat." London, 1825.

IOWA.

American: a dialect of DACOTA or SIOUX. Iowa, a State admitted in 1846, is derived from the PAHOJA, or "Grey-snow," Indians, who now reside N. of the R. Des-Moines. Schoolcraft: "History . . . of the I. Tribes," Philadelphia, vol. iv., p. 307.

LETT, LETTIC, or LITHUANIC.

Class name for a division of the WENDIC or SLAVONIC branch of the ARYAN family of languages, represented by (1) the OLD PRUSSIAN, extinct; (2) LITHUANIAN, the Lettish of Lithuania; (3) LIVONIAN, the Lettish of Livonia.

* * * Dr. Latham considers that the LETT or LITHUANIAN should form a class by itself, but Prof. Max Müller combines them with the SLAVONIC as a branch of WENDIC.

LETTERS.

The constituent parts of an alphabet, distinguished by form, name, and sound. The primitive forms of early letters have been traced by some to picture writing, and the objects so represented are said to have originated the early names: thus, the ox—"aleph," used as a symbol, has become letter A; "beth"—a house, has become B; "ghimel"—a camel, has become G, or C, and so on. *See PHONOLOGY.*

LETTI.

LIANG.

Malayan: dialect of AMBOYNESE. Wallace: "Malay Arch."

LIBYAN.

Languages often called by the vague term BERBER. These languages must now be reckoned as at least five in number: the SHOWIAH, or Algerine Berber; the SHILHA, or Morocco Berber; the TAMASHIGHT, or Berber south of Mount Atlas. The last is the purest and most widely extended. Besides these there are two others of very limited extent, that of the town of Ghadames and that of the Beni Menasser. These languages were formerly all one, as Augustine says: "In Africâ barbaras gentes in unâ linguâ plurimas novimus." Hanoteau has made the very interesting remark that to translate from the Tamashight into Arabic, and reciprocally, though the vocabulary is widely different, is peculiarly easy, yet this proves common cultivation rather than a common origin. In a preface to the 4th appendix to Barth's fifth volume of "Travels in Africa," a summary is given by Professor F. W. Newman of the grammatical relations of the three chief languages to one another, but it was written without the advantage of Hanoteau's Tamashight Grammar. We can now judge pretty accurately how they are all related to Hebrew. F. W. N. *See HEBRÆO-AFRICAN.*

* * * Many inscriptions in the ancient written languages remain, some bilingual, Phœnician, and Lybian. H. C.

LIEF.

Ugrian : dialect of FIN, spoken in Kurland.

* * This name is the root word of Livonia or Lief-land, a Russian government on the Baltic, but the native name for the original population is "Rahwa," and these forms of speech are separated. The Liefs of Kurland call themselves "Sea-shore men"; the true Kurlanders speak Lithuanic. See CURRISH.

MALABARI.

DRAVIDIAN : the same language as MALAYALIM ; but there are local variations. *See* vocaby. in Hunter's "Comp. Dicty."

MALAGASY.

The native language of Madagascar, a large island off the S.E. coast of Africa ; it is a POLYNESIAN compound, comprising elements from the BALI, JAVANESE, NIAS, and TOBA ; the language and people are called MALAGASH ; the native term for the island is Nosindambo, "wild-boar island." The Hovas are the dominant race. See early Catechism, 1658 ; Flacourt's "Dicty.," 1658 ; works by Freeman and Ellis ; Introduction by Kessler, London, 1870 ; Grammar by Van der Tuuk.

* * The history of the Hovas is still very obscure, but Mr. Van der Tuuk has sufficiently proved that their language is a peculiar branch of MALAYAN, showing affinities to JAVANESE, BATAK, DAYAK, &c. P. J. V.

MALALI.

American ; a dialect of Botocudo classed as CAMACAN, and allied to MACONI. See vocaby. in Da Silva's "Dicty." H. C.

MALAY.

(1) HIGH-MALAY : typical Polynesian ; language of the peninsula of Malacca. See "Grammar and Dicty." of Crawford, London, 1852 ; by Marsden, London, 1812 ; by Pynappel, by Hollander, Breda, 1864.

(2) BATAVIAN or LOW-MALAY. See "Handleiding," by Homan and Van der Tuuk. Zalt-Bommel, 1868.

* * Low-Malay is merely corrupt Malay, as introduced by Europeans. The best vocabulary is by Badings, Dutch-Malay and Malay-Dutch, Schoonhoven, 1872. Batavian Malay is a dialect of SUNDANESE, with an admixture of BALINESE and other foreign words. P. J. V.

(3) Dialects are known as AMBOYNESE MALAY, MENANG KABAW, or SUMATRAN MALAY, ACHINESE and other Polynesian forms.

* * All languages spoken in the Indian or Malay Archipelago [except those of the Galela group], and not directly Papuan, are called "Malay languages," and considered to belong to the one great Malayan family.

More particularly Malay is the language of a nation spread over a great part of Sumatra, the Malay Peninsula, Singapore, and the archipelago of Rhio-Lingga, and which has founded many colonies on the coasts of Borneo and the eastern islands of the Indian Archipelago. Besides the common or so called cosmopolitan Malay, it is spoken in a peculiar dialect, called the Menangkabau Malay, in the interior of Sumatra.

Malay in a very corrupt form, disfigured by ignorance of the character of the language, and the arbitrary intermixture of foreign words, has become the ordinary means of intercourse between Europeans and the natives of the Indian Archipelago. This is called Low-Malay, and differs in almost every locality.

Malay is written with the Arabic character. Through the contact with Europeans the use of the Roman alphabet is gaining ground.

The affinities of Achinese are still very obscure, and we have no vocabulary of the native language except that in Marsden's miscellaneous works ; therefore Mr. Crawford errs when he calls Achinese (p. lix.) "a cultivated and written language," for the literary language of the Achinese is genuine Malay. P. J. V.

MALAYALIM, MALAYALMA.

DRAVIDIAN: vernacular speech of Malabar, and other provinces of the Madras presidency; it is closely allied to **TAMUL**, using an alphabet of somewhat similar character. It has stages; anct. and mod. Grammar by Peet, Cottayam, 1860; School Dicty., Mangalore, 1870.

MALAYAN.

Class name for all dialects of the **MALAY** family.

MALAYO-POLYNESIAN.

MANDSCHU, *under* MANTSCHU.

MANDURESE, *see* MADURESE.

MANG.

Dravidian ; a local dialect of TAMUL spoken in the Mahratta territory.

MANGALA.

Singalese : dialect of KANDY.

MANGAREI (MANGUREO).

Polynesian : dialect of FLORES or MANGEYLE, with AUSTRALIAN affinities. It is spoken on the W. coast ; the people are subject to the Sultan of Bima.

MANGASEIA.

Ugrian : dialect of SAMOIED, closely allied to TUNGUS. Small vocabulary in Latham's "Elements," p. 77.

MANGEEA.

POLYNESIAN : dialect of the Friendly Is., situated 158° 16' W. long. ; 21° 27' S. lat.

MANGKASAR.

Proper spelling of MACASSAR. This Malayan language is spoken in the S. peninsula, viz., in the capital of Celebes and its environs ; in Tallo, Gowa, Saurabone, Takalar, Turuteya, Bonthain, and part of Bulecomba. It is nearly allied to BUGIS, which is spoken in Maros, Pangkajene, Segéri, Tanette, Barru, the Aja Tapparang, the remaining part of Bulecomba, Boui, Soppeng, Waju, and Luwu.

* * * The grammatical structure and syntax are alike in Bugis and Mangkasar, though the difference of words is considerable, and the alphabet is the same in the main, with slight modifications, but not sufficient to justify the assertion of Mr. Wallace ("Malay. Archip.," vol. ii., p. 472) that Bugis is written in a native character distinct from that of Macassar. There still exist some ancient MSS., written in an older alphabet, now quite obsolete. See "Makassaarche Spraak-Kunst," by Matthes, Amsterdam, 1858 ; "Woordenboek," 1859 ; "Chrestomathie," 1860. P. J. V.

MANGRI.

MASACARA.

American: dialect of **GES** spoken in Brasil. Von Martius, vol. ii., p. 144.

MASAYA or MASYA.

American: dialect of **NICARAGUA**, but allied to the **SILOUX**. H. C.

MASORETIC.

HEBREW: "Masora," i.e. "traditional"; applied to the received Jewish version of the O. T. It owes its value to the system of points introduced to supply the want of vowels.

MASSACHUSETT.

American: extinct dialect of **ALGONKIN**. Vocab. : "Amer. Ethnol.," vol. ii., p. 110.

* * The name carries with it its own geographical position. The town of Boston, U.S., now stands on the land of the Massachusetts Indians. I find that **NATIK** or **NADICK** is rather a synonym for **MASACHUSETTS** than the name of a separate form of speech, whether language or dialect; on the coast, the name changed, and the language also, which is **NARRAGANSET**. The two forms are closely allied, but **MASSACHUSETTS** means the parts about Boston, **NARRAGANSET** the language of Connecticut and Rhode Island. The greatest work in any American language is, undoubtedly, the translation of the Bible by Eliot; but no one knows whether the language is to be called **NATICK** or **MASSACHUSET**. Eliot also wrote a Grammar, dated A.D. 1666; the author merely calls it **INDIAN**; reprinted at Boston in 1832. R. G. L.

MASSARATTY.

Malayan: dialect of **BOOROO**, closely allied to **CAJELI**. See Wallace: "Malay Archip."

* * The language of Booroo is a dialect of the Moluccan **ALFURU**.

American : dialect of CARIB spoken in Guiana, most closely allied to SOERIKONG.

MAWI, see MAORI.

MAYA or MAYAN.

AMERICAN : Class name for many languages of Central America, especially those of Yucatan and Guatemala. In the former it rules exclusively ; in the latter it is a closely allied form of speech. The POCONCHI (with the exception of certain rude dialects belonging to the same class) is the representative language. The KACHIQUEL is a third language of equal importance. In Vera Cruz, for the parts about Tampico, an allied language, the HUASTECA, separated from its congeners, is (or was) the original vernacular. Grammatical sketches, "artes," as they are called by early missionaries are as early and fully as numerous for the Maya languages and dialects as for any in America, dating from the seventeenth century. A short but valuable work by Squier is the chief authority for them. "States of Central America," by T. G. Squier, N. York, 1858 ; "Etudes," by Brassier De Bourbourg, Paris, 1869-70 ; "Silabario," by Ruz, Merida, 1845 ; "Phonetic Alphabet," described by Brinton. R. G. L. See VEY.

MECH-CHAOOH.

American : same as MOHEGAN.

See MEKO.

MECKLENBURG.

Teutonic : sub-dialect of LOW-GERMAN. Grammar by Ritter, Rostock, 1832.

MECKLEY, see MOITAY.**MEDIAN.**

Properly the language of the ancient Medes, a people of the high country between Mesopotamia and the Persian desert, only known through names and a few words, which show it to have been ARYAN, and closely allied to ancient PERSIAN. The term "Median" was at one time applied to the language of the third column of Achæmænian cuneiform inscriptions, but it is now admitted that this was a misnomer. On the real Median language, see Rawlinson: "Ancient Monarchies," Media, vol. iii., pp. 137-156. G. R.

MEDO-PERSIAN.

Class name for the branch of ARYAN speech, with slight differences, common to the ancient Medes and Persians. G. R.

MEDO-SCYTHIAN.

Dr. Hincks' name for the language of Scythic tribes dwelling in Media and Persia, known to us by a peculiar form of inscriptions in cuneiform.

* * The best account of the language, which is decidedly TURANIAN, will be found in Norris's "Scythic Inscriptions of Behistun," "Jnl. of R. As. Soc.," vol. xv. G. R.

MEFUR.

Negritic : dialect of PAPUAN, vernacular in New Guinea.

MEHERRIN.

Same as KELENONESIAN ; it represents the S.W. Islands of the Pacific, consisting of the Loyalty group, Bank's Santa Cruz, the Solomon Archipelago extending W. by N., to include New Guinea.

MELLELE.

Class of GIPSEY.

MELON.

African : allied to NHOTEN and NHALEMOR. H. C.

MEMPHITIC.

Egyptian : an extinct dialect of COPTIC ; it was spoken over the district about Memphis, and represented the language of middle rather than upper or lower Egypt. R. G. L.

MENADO or MENADU.

A large class of dialects spoken in Celebes or Macassar, classed as ALFURU, and somewhat allied to BUGIS. (Wallace.) See MINAHASSA.

MENAK.

Javanese : in the SUNDANESE dialect "Ménak" means "a noble, one of high birth ;" hence high-Sundanese is called BASA-MENAK. P. J. V.

MENANGKABAW.

MALAYAN : dialect of the Dutch residency in the highlands of Padang, Sumatra, which was anciently an independent monarchy called MENANG KABAW. It differs considerably from ordinary Malay. Vocabulary, &c., edited by Pynappel (Dialogues : Menangkabaw and Malay). P. J. V.

MENASSER (BENI).

Language of the BENI MENASSER, a branch of the BERBER. See LIBYAN. Baron de Slane first published the pronouns of this language, which differ so much from the other Libyan languages that it must be unintelligible to those who know only the others ; yet it is small and unimportant. H. Duveyrier (1857) places the tribes near to the Hhal-lûla Lake, and says that they have adopted Arab manners, an Arabic name, and an immensity of the Arabic language. He gives an extremely limited vocabulary. He thinks that it and the dialect called that of the Benî Mezâb, is a branch of the ZENATIA dialect, and is connected with that spoken in the oasis of Touât. But the last is supposed to be TAMASHIGHT. F. W. N.

MEWARA.

Same as RHATORE, sub-dialect of BOWRI.

MEXICAN.

It is of some importance to remember that MEXICAN is not a philological but a geographical term, and that the indigenous name of the occupants of the parts about the present city of Mexico was Nahuatl, akin to whom were the Tlaskala. The Asteks were conquerors and intruders—the Chetimacha probably the same. This is important when we remember that the three names, Nahuatl, Huasteca, and Tlaskala are to be found in three different districts far away from Mexico. At present MEXICAN and ASTEK are nearly synonymous ; just like Quichua and Peruvian. See "Dialogues," by Arenas, Paris, 1862 ; Glossary by Biondelli, Milan, 1869 ; "Cuadro Descriptivo," by Pimentel, 1862-5. For Picture Character, see Humboldt's "Atlas Pittoresque." R. G. L.

* * In the Great Andaman island of the Indian Seas at least two distinct languages are known, viz., that of Colebrooke's Vocabulary, and that of Tickell's. These people are Negritos of small stature and with glossy skins. Their affinities are with those of the short races in other parts of the world, and they have probably the most ancient languages yet known. See "Asiatic Researches," vol. iv., p. 393 ; x., 218. H.C.

See PYGMEAN.

MINDANAO, see MAGINDANAO.**MINETARI.**

American : dialect of SIOUX, N. division, called "Grosventre," i.e. "big-bellies," EHATSAR ; other dialects are ALASAR, or Fall-Indians, and KATTANAHAWS. Ludewig, London, 1858, p. 119.

* * Dr. Latham objects to the word "Alasar." According to that great authority it is a misnomer, arising from some confusion between the words "Ahnenin" and "Atsina." The former are classed by Gallatin as ARRAPAHOES. See "Amer. Ethnol.," vol. ii., where the same vocabulary is printed as ATSINA. We have no original authority for the word "Alasar," but it appears in Jülg's "Vater," p. 253. See Trübner's "Ludewig," p. 12 ; also Latham's "Elements," p. 457, where it is shown that there are two different tribes called Fall Indians, one ALGONKIN and one SIOUX.

Soc. 1868), in the preface to which is a list of all the editions of "Ulphilas" and an account of all MSS. written in Mæso-Gothic, the most famous of the MSS. being the "Codex Argenteus" at Upsal.

* * Prof. Max Müller thinks that the era of Ulphilas should be stated as 311-381 A.D. The Mæso-Gothic is LOW-GERMAN, and varies widely in spelling from high-German. This important fact is often passed over in the text-books, which copy from each other. W. W. S.

See SUIO-GOTHIC.

Indic : an extinct dialect of SANSKRIT, derived through PRACRIT, forming the sacred language of the Buddhists; it has a peculiar alphabetic character of its own. BALI and LANKA-BHASA (ancient SINHALESE) are derived from it, and it has very largely influenced modern CINGHALESE. Dicty. by Thero and Subhuti, Colombo, 1865; and one now in progress by R. C. Childers; "Kachcháyana's Grammar," by Mason, London, 1870.

PALIMPSEST.

PALÆOGRAPHIC : "written-over"; used of MSS. having a second inscription laid over a previous one.

* * * A term signifying "twice-rubbed," or "scratched," and applied properly to parchments which, after having been written on, have been prepared for a fresh writing by an erasure of the original one. In the middle ages, when parchment came to be scarce and dear, many valuable MSS. were thus used, and a second worthless writing placed over one infinitely more precious. In some cases the original MS. has been recovered by careful examination, *e. g.*, the text of Cicero's treatise, "De Republica." G. R.

PALLA.

SUB-TURANIAN : tribe of Awalias in Nipal.

PERSIAN.

Iranic : modern dialect of Persia, derived from Old PERSIAN, but with a large infusion of ARABIC words, and written in a modification of the Nishki-Arabic characters, called TAALIC, and in a running hand called SHIKESTAH. Grammar by Vullers, Gissæ, 1870 ; Dictys. by Johnson and Richardson. Dialects are MAZENDERAN ; see Klaproth's "Beschreibung," Berlin, 1814. TATT, the dialect of Baku in Daghestan ; see Eichwald's "Reise," Stuttgart, 1834. Twelve are specified by Von Hammer, "Asiatic JI.," 1833. See TAJIK.

PERSIC.

Under this term are comprehended all the various forms of the Persian language, with the exception of the dialect now spoken. The Persic is known to us in three stages :—

(1) The language of the Achæmenian dynasty, recovered from the cuneiform inscriptions of Cyrus, Darius, Xerxes, and other kings. See Spiegel : "Die Altpersischen Keilinschriften," Leipzig, 1862.

(2) The PEHLEVI or HUZVARESCH, the language of the Sassanian period (A.D. 226-650). IRANIC, with considerable SEMITIC infusion ; known from coins, inscriptions, and literary productions.

(3) PARSI or PAZEND ; the language as it reappears subsequently to the Arab conquest ; purified to a great extent of the Semitic ingredients, and once more thoroughly IRANIC. Known from translations of the Avesta, &c.

The PERSIC, in its earliest form, is closely allied to OLD BACTRIAN or ZEND. Latterly it branched out into several dialects, as the DERI, the HEREVI, the PARSI, or PAZEND, the SEGZI or dialect of Seistan, the SOGDI of Sogdiana or Bokharia, and the ZAVULI of Zabulistan. G. R.

PERTH.

Native dialect of S.W. Australia. Vocab. by Capt. Grey, 1841.

PERUVIAN.

This is a geographical rather than a philological term. The Peruvian area, nearly coinciding with the present republic of Peru, reaches along the coast from the north of Quito, on the boundaries of the Ecuador and New Grenada, to Chili, *i.e.* from the Equator to 24° S.L. Its most eastern extension is in Tucuman; its general run, however, is from north to south. The two (allied) languages which most especially belong to it are the QUICHUA and AYMARA. Notices of ruder tribes within the same area we have many, but with few and exceptional vocabularies. JURACARES, MAYORUNA, and CALCHAQUI, ATACAMA, CHANGOS. Lopez: "Les races Aryenne de Peru," 1872. SHIKASTAH.

Cursive form of TALIK characters, used in Persian as a running hand.

SHILHA.

The language of the Shilouh (Fr. Chelouh) probably represents to us that of the ancient Mauritians and western Gætulians. It is now spoken in the highlands and outlying districts of Morocco. Though immensely overrun by ARABIC, it preserves its ancient grammar as a LIBYAN tongue. The pronominal system distinguishes it from the kindred languages. In the "Journal of the Asiatic Society" (1847) a long specimen of this language was printed in the Arabic character ("The Narrative of Sidi Ibrahim"), with a tentative interlineary Latin translation and some Notes by Professor Newman. F. W. N. See LIBYAN.

SHOUSHWAP, SHUSHWAP.

American: same as ATNA.

See SELISH.

SHOWIAH.

(Fr. Chaouia), one of the **BEPPER** or **LIBYAN** languages. The name Kabail, or Kabyle, is given by the Arabs. It is exceedingly mixed with **ARABIC**, yet retains its own forms of grammar. The Arabic article "El" (or the letter L initial) is often imported with an Arabic noun, as with us in the words "Alcoran," "Alcohol"; and feminine nouns take T at each end: as "Tamdint," from Arabic Medina(t), city. The language is spoken chiefly in the highlands of Mount Atlas, towards Algiers, especially in the province of Constantine. There is little doubt that it represents to us the ancient Numidian, and one branch of the Gætulian. Brosselard's Dictionary, "Français Berbère," whatever its value to a traveller, disappoints a philologer; for by far the greater part of it is Arabic in disguise. Hanoteau's "Grammaire Kabyle," gives a large mass of pure words: he has selected the Zouave dialect by preference. It is rougher than that of Bougie, into which Sadi Hamet translated the book of Genesis and the four Gospels for the Bible Society. F. W. N.

See LIBYAN.

SHYAN, *see* SHAN.

SHYENNE.

(Fr. Cheynne). American: **ALGONKIN** dialect of the Kansas, allied to **ARRAPAHO**. "Amer. Ethnol.," vol. ii.

SINAITIC.

Epigraphic : name for certain inscriptions at and near Wady-Mukatteb, or "written valley," in the peninsula of Sinai.

The language of these inscriptions is ARABIC, with a slight ARAMAIC influence. The character is peculiar, but allied to the ARAMAIC, the PALMYRENE, and the modern ARABIC. The view of the inscriptions taken by the Rev. C. Forster ("Voice of Israel," London, 1860) is not generally endorsed by Semitic scholars, who assign the inscriptions to a time a little earlier and a little later than our era. See Beer : "Inscriptiones veteres ad Montem Sinai servatæ," Leipzig, 1840-3. Also "Zeitschrift d. Deutsch. Morgenländ. Gesellschaft," 1849, pp. 129-215. G. R.

SUMENAP.

JAVANESE of Madura.

SUNDANESE.

The language of the western part of Java, separated from the genuine Javanese districts by the rivers Chi Losari in the north and Chi Tandooi in the south. The influence of the Hindoo colonists on this part of Java has been very limited: hence both the people and their language are less civilised than those of middle Java. The language, though equally belonging to the MALAYAN family, differs considerably from the Javanese, and seems to be more nearly akin to the BATA and MALAY of Sumatra. There is some difference between the high and low language as in Javanese—the former being called BASA-MENAK, the latter BASA-KURING. The number, however, of distinct Menak words is not considerable, and most of them are derived from JAVANESE. The Sundanese was, till recently, seldom written. The natives, for writing it, make use either of the Arabic or of the Javanese alphabet, the latter with some slight modifications. P. J. V. *See* BATAVIAN-MALAY.

TAMAZIGHT, TAMASHIGHT, TAMACHEK'.

The language of the Tawâriq (Fr. Touâreg), as the Arabs name the people who dwell over an immense space of Africa, south of the Atlas. (See LIBYAN for the class.) Dr. Richardson calls the language *TOUARGHEE* ; Duveyrier calls it *TARGISCH*. It is remarkably free from Arabic importations, and has an alphabet of its own, highly peculiar, called the *Tefinagh* ; only consonants are written, so that the writing is a shorthand, difficult to read ; the more so, because the laws of grammar help little to the vowels. Hanoteau defines the language as "limited to the West by a curve line drawn from Waregla (Wergela) through the oasis of Touât towards Timbuctoo ; to the South by the Niger and the kingdoms of Bornou and Haussa ; to the East by Fezzan and the country of the Tibboos ; to the North by Tripoli, Tunis, and Algiers." This vast extent, as well as its purity, makes it the chief of the LIBYAN languages. Its consonant sounds are fewer than those of the Zouave, which has borrowed from Arabic. In the fifth volume of Barth's African Travels are words and sentences of considerable extent in Tamashight ; but the publication of Hanoteau's ample Grammar somewhat lessens their importance. F. W. N.
